PREMIUM PAD **INDUSTRIAL BROWN**

DESCRIZIONE

The Premium Pad Industrial Brown are suitable for deep washing and de-waxing of protected and non-protected floors.

Useful for the maintenance of very dirty industrial floors, acid treatment of terracotta, cleaning of natural stone and porcelain stoneware.

The open weave structure of these pads prevents them from clogging and dirt accumulation.

The combination of individually separated fibers coated with abrasive powder promotes maximum contact between pad and floor, ensuring excellent cleaning results.

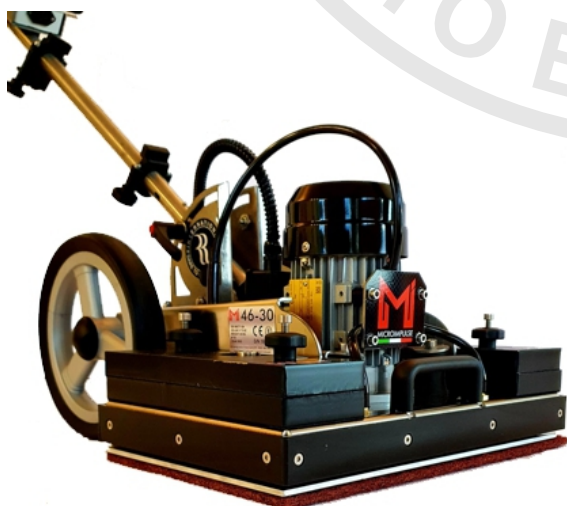

The Premium Pad Industrial Brown in some cases can only be used with water without any type of detergent. Very resistant to acids and strongly alkaline products.

Not suitable for delicate floors, if in doubt it is always advisable to do a test in a hidden area

TECHNICAL SPECIFICATIONS
