

40 ERGO

40 ERGO

Ergonomic and compact, the Q40 scrubber-dryer is very robust, equipped with an AISI 304 stainless steel frame with a working width of 410 mm.

With only 3 liters of cleaning solution, it can clean and sanitize more than 100 square meters. The "eco" function manages the water distribution in a timed manner ensuring useless waste.

It has lithium batteries that allow you to obtain more than 1 hour of full autonomy and as an optional a 36V/220V transformer that allows you to use the cable machine with infinite autonomy.

Indispensable machine for deep cleaning in medium/small rooms full of obstacles.

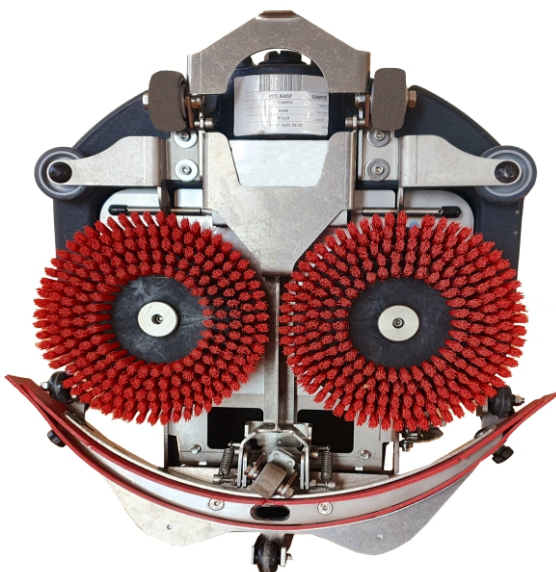

Thanks to its floor squeegee that lifts and its strong pressure on the floor, Q40 becomes useful for deep cleaning just like a single disc floor machine.

By applying different types of brushes or pads, the machine is multipurpose. All this is made possible thanks to the oversizing of the motors which guarantee an out of the ordinary functionality and effectiveness.

In addition, the Q40 has 3 brush rotation speeds which allow excellent handling according to the size of the areas to be treated.

36 Volt lithium battery and exclusive 36/220 Volt current transformer (optional)

Technical Features

Power unit :	36 Volt 13 ah - Lithium
Vacuum motor:	330 Watt by-pass double stage
Theoretical Yield Sq/h:	1000
Practical Yield :	550
Working width:	Cm 410
Squeegee width:	Cm 500
Brushes size :	2 x cm 215
Brush speed rpm:	140 - 170 - 220 adjustable
Brush pressure :	Kg.29 (with full tank)
Brush motor power :	2 x 120 Watt
Clear water tank:	3 Lt
Recovery tank:	5 Lt
Working time:	1 Hour
Noise level:	67 db.(ECO mode)
Charging time :	4/5 Hours
